

## Global Logistics – Optimize current Global logistics while improving visibility!

As international trade has proliferated, so have the number of supply chain challenges. Complex import and export regulations, bilateral and multilateral trade agreements and more choices of suppliers and countries to source from have greatly increased the complexity of the decision-making processes. Companies are recognizing the importance of logistics as a key component of supply chain management. Minimizing transportation and distribution costs while maximizing product profitability has always been a challenge, but in an environment of skyrocketing fuel, labor and basic commodity prices, it is now harder than ever.

LCS works with our clients to design (or redesign) and implement sustainable, cost effective and efficient processes in their global logistics. We focus on small to mid-size businesses leveraging our vast experience to provide reasonable, fact-based and unbiased solutions. We listen carefully to your business needs, then offer you a range of customized options designed to give you control over costs and performance.

Our Customers leverage our experience to achieve competitive advantages in transportation, brokerage, distribution, packaging and fulfillment.

In addition, LCS can serve your company as a LLP, Lead Logistics Provider. We can manage and coordinate all of your logistics information and resources to meet your expectations. At LCS, a high level of customer service is standard and never compromised while helping our customers achieve their supply chain objectives.

### Helpdesk Support Services

The LCS Help Desk is available 24/7 and is responsive, reliable and cost effective. We focus on providing immediate solutions to day-to-day issues or questions that arise in the area of supply chain and global logistics allowing our clients to manage their resources more efficiently.
